

SELL CARS, PARTS AND SERVICE PROFITABLY.™

ADVERTISED PRICE COMPLIANCE

Protect your dealership

Advertising vehicle specials is an every week occurrence for most dealers. Have you been concerned that those vehicles on special are being sold for a price higher than what was advertised? Without properly monitoring every deal and every vehicle advertised you are opening your dealership up to potential lawsuits. With your protection in mind, **Advertised Price Compliance** was developed.

Explore the benefits:

- Any deal that is created with an advertised stock number will have the sale price automatically adjusted to the advertised price
- Users will not be allowed to sell the vehicle for a price higher than what was advertised
- Link advertised vehicles to specific stock numbers and a sale price
- Create advertised pricing beginning and ending date ranges
- Price restrictions are effective in Work a Quote and F&I functions
- Set up advertised pricing for as many vehicles as you wish
- Advertised pricing stays in the system indefinitely allowing you to reactivate an advertising special or review past advertisements
