

SELL CARS, PARTS AND SERVICE PROFITABLY.™

FLAT FILE GENERATOR (FFG)

FFG: Countless Possibilities

Car!nk has developed a new and powerful tool called **FFG** providing you countless possibilities of extracting data from your ADP system. You can create any combination of reporting tools pulling data from multiple logons on the same system, creating a world of information to operate your business.

FFG: As Many Details As You Desire

- **FFG** allows you to create your own reporting tools
- You choose the logons to pull information from; as many as you want on one report
- Use **FFG** to compare data between multiple stores
- Create scheduling to run your reporting automatically
- Send your reports directly to your PC and download into the application you desire
- Leverage the internet, encrypt your data, and send your reporting using FTP
- Multi-Valued fields have been a problem in the past, no longer with **FFG**. We can break out multi-valued fields and give you the complete story on your data
- You can choose the type of delimiter that best suits your needs- Comma, Tab, or Tilde
- Create databases with each of your dealerships figures side by side, giving you one place to look for the answers
- Append information to existing files; great for historical facts

Using FFG will give you the necessary information to make the necessary business decisions and sell cars, parts, and service profitably.

Find out how much information is possible by calling Car!nk at 800-382-8199 or visit us at www.carink.com.
