MULTIPLE UNIT AUTOMATOR

Attention Fleet Departments, Marine Dealers, and Truck Dealers: Maximize the Sales Process

Many Units = 1 Deal

CMUA has been created to provide you a more efficient process to sell many units at one time on a single F&I deal. By utilizing the Multiple Unit Automator system you will have the means of processing an unlimited number of deals in a matter of moments.

- Rather than creating several deals, use CMUA to create 1 deal with as many units as you desire
- Setups provide the capability of standardizing fees, taxes, insurance, terms, and rates
- CMUA allows you 4 choices for selecting units for the sale
 - You can create one deal and then duplicate it across several stock numbers
 - A unit inventory search permits you to tag several units from one screen and process a single fleet deal for all of the selected units
 - Keeping in mind units may have different pricing, CMUA allows you to enter each stock number and a price for each vehicle
 - Lastly, by entering stock numbers manually you can begin the fleet deal
- Rather than having to print one form per vehicle, CMUA provides you the ability to combine all of the sold vehicles onto one form

To find out more about Multiple Unit Automator, call us at 305-630-1700 or visit us at www.carink.com
